

# Thermometer for ball valves TT-TVR

The thermometers are specially designed for ball valves with an integrated thermometer holder. They enable reliable and direct temperature measurement in the heating or drinking water system. Thanks to the simple plug-in installation, they can be inserted without tools and easily removed if required.

## TECHNICAL DATA

Temperature range	0 - 80 °C
Scope of delivery	2x thermometer for ball valve with thermometer holder
ORDER NO.	5015
